EVENT 2019

MACFRUT 2019

Supply chains meet the world of biostimulants

FRIDAY 10 MAY 2019 - 10.00 A.M.
SALA NERI - FIERA DI RIMINI

What do consumers expect from agricultural producers and how can biostimulants be of help to us?

What advantages do biostimulants bring to farmers?

What will change with the new regulation on biostimulants and fertilisers?

Can we trust these products and how can we find out more about them?

These questions will be addressed during the Biostimulant International Congress at Macfrut 2019.

Supply chain managers, researchers, and large-scale retail and industry representatives will be speakers at the event.
